Corresponding Author Email: corresponding.author@univ.com

Abstract

Should start on a new page after the title page and should be typed in single-space to distinguish it from the Introduction. Abstracts should briefly reflect all aspects of the study, as most databases list mainly abstracts. Short Communications as well as Review Articles should have an Abstract.

Key-words

Provide four to eight appropriate key words after abstract and arrange them alphabetically.

Introduction

Shall start immediately after the Abstract, as the next paragraph, but should be typed in double-space.

Figure 1: Legend for Figure 1 to be typed here

The Introduction should lead the reader to the importance of the study; tie-up published literature with the aims of the study and clearly states the rationale behind the investigation. ¹

¹Department of Environment, Name of University, City, Country, Pin code

²Department of Environment, Name of University, City, Country, Pin code

³Department of Environment, Name of University, City, Country, Pin code

Materials and Methods

Material and methods shall start as a continuation to introduction on the same page. All important materials used along with their source shall be mentioned. The main methods used shall be briefly described, citing references. 1

Figure 2: Legend for figure 2

Trivial details may be avoided. New methods or substantially modified methods may be described in sufficient detail. The statistical method and the level of significance 1

chosen shall be clearly stated. Current World Environment Journal prefers to publish work that has been subjected to an appropriate statistical test at one level of significance.

Results

All findings presented in tabular or graphical form shall be described in this section. The data should be statistically analysed and the level of significance stated. Data that is not statistically significant need only to be mentioned in the text – no illustration is necessary.

Title	Id	Val1	Val2
Title1	1	5	3
Title2	2	1	2
Title3	3	7	13
Title4	4	4	11

Table 1: Legend for table 1

All Tables and figures must have a title or caption and a legend to make them self-explanatory.

Results section shall start after materials and methods section on the same page.

Discussion

This section should follow results, deal with the interpretation of results, convey how they help increase current understanding of the problem and should be logical. Unsupported hypothesis should be avoided.

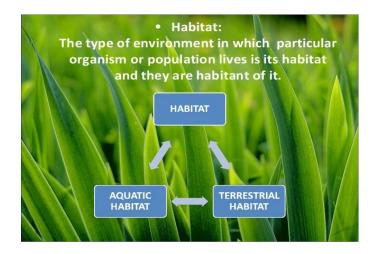

Figure 3: Legend for figure 3

The Discussion should state the possibilities the results uncover, that need to be further explored. Results and discussion of results can also be combined under one heading, Results and Discussion.

Conclusion

Proper conclusion is required in all the articles.

Acknowledgements

Acknowledgement will include the acknowledgement to the research team or any entity which has provided help during the work.

Funding Sources

This section will include any funding sources along with the grant number (if any) provided to facilitate the research work.

If there are no funding sources then following statement should be mentioned: The author(s) received no financial support for the research, authorship, and/or publication of this article.

Conflict of Interest

All authors are requested to disclose any conflict of interest including any financial, personal or other relationships with other people or organizations that can influence their work.

If there is no conflict of interest then following statement should be mentioned: The author(s) declares no conflict of interest.

References

Reference style: AMA (American Medical Association)

- 1. References should be numbered consecutively in the order in which they are first mentioned in the text (not in alphabetic order).
- 2. References should be cited in the text in superscripts only

Use the style of the example below:

Example: Journal article (print)

Godhia M. L., Naik N. Altered Lipid Responses to Dietary Interventions in Obesity. *Curr Res Nutr Food Sci Jour.* 2015; 3(1):01-11.
